## WORK EXPERIENCE

### Lead Frontend Developer, PALFINGER AG
2018-present

- UI/UX implementation lead
- Working close with the designers to ensure a generic UX across the platform
- Taking care about the code quality by utilizing dedicated tools during the build process, managing build pipelines
- IOT platform implementation, utilize different types of charts, maps customization and presentation of the geodata
- Working in the agile process model (Scrum), occasionally took role of the Scrum master
- Introducing latest technologies, working on monorepo environment, ensuring code quality with unit & frontend tests, REST API e2e tests, reactive programming (RxJS, NgRx)

### Lead Frontend Developer, Aquicore Inc.
2013-2016

- SaaS enterprise software frontend architect
- Participated in all stages of the product life cycle
- Created/used responsive web frameworks to ensure high standards of the product
- Worked with data visualizations using Flot Charts and Highcharts, developed custom visualizations/charts
- Created mockups/wireframes/HQ designs based on requirements
- Tested front-end code in multiple browsers to ensure cross-browser compatibility, unit and e2e test scripting

## STRENGTHS

**Frontend**
▢▢▢▢▢▢▢▢

**Backend**
▢▢▢▢▢▢▢▢

## FRONTEND

JS, Angular, RxJS, NgRx, Material design, Twitter Bootstrap, CSS, SCSS, Less, TypeScript, TSLint, SCSS Lint, Protractor, Karma, monorepo, webfonts, Prettier, Highcharts/ngx-charts, AngularStrap, Restangular, Affinity Designer

## BACKEND

PlayFramework, Laravel, Slim, Hibernate, Eloquent, PostgreSQL, MySQL, Java, PHP, REST API

## MOBILE

Ionic, NativeScript, CoronaSDK

- Maintenance/custom development of external web site using Jekyll/Wordpress, performance optimization
- Occasionally worked on backend architecture, technical documentation

### Aquicore ApS, Esbjerg, Denmark
2014
